

APPLICATION FORM

GKS for ASEAN Countries' Science and Engineering Students

I. Personal Information

Name in Passport	First Name		Last Name		
	THANH DUY		TRAN		
Date of Birth	10/16/1996	Gender	Male		
Citizenship (Nationality)	Viet Nam	Passport No.			
Home Address	3-4 Dong Hung Thuan 42 Street, Distric 12, HCM City, Viet Nam				
Contact	Home Phone	(+)	Mobile Phone	(+ 01228755298)	
	Email	Anhsock37@gmail.com			
Emergency Contact	First Name		Last Name		Relationship to You
	THI CHIN		TRAN		Mother
	Home Phone		Mobile Phone		Email
			01212063049		Tranthichin134@gmail.com

II. Educational Background

Institution Currently Enrolled	Name of Univ./College	LY TU TRONG COLLEGE Of HCM City	Current Year	2nd
	Major	Automatic Technology	Overall G.P.A.	7.4/10
	Address	390 Hoang Van Thu Street, Ward 4, Tan Binh District, HCM City, Viet Nam		

III. Institution and the Field that You Apply For

University Name	Chosun University
Field of Study	Mechanical Engineering, Welding and Joining Science Engineering

GKS for ASEAN Countries' Science and Engineering Students

Self Introduction & Research Plan

I. Introduce yourself.

Dear President of Chosun University and Rector of Ly Tu Trong College,

My name is Tran Thanh Duy, a student of class 16CDN-O2 in Automatic Technology at Ly Tu Trong College. I am currently in the second year of the Faculty of Automotive Engineering And I'm learning basic skills to assemble and repair car details.

My school is LY TU TRONG college was established in 1984, is one of the key public technical schools in HCM City, prestigious in the quality of training human resources for socio-economic development needs of the city and nationwide. I am currently studying basic skills at Ly Tu Trong School and I am looking forward to learning Korean advanced mechanical engineering.

I have learned and known that Ly Tu Trong college and the Korean government are partners in organizing courses 2018 GKS for ASEAN countries' Science and Engineering Students of universities and colleges in Southeast Asia, and I am honored to be one of the students enrolled in this course and I would like to study at Chosun University. Chosun University was founded in 1948 as one of Korea's leading engineering training institutions, with more than 70 years of training to the most experienced engineers in Korea. I would like to have access to state-of-the-art machinery and new technology to supplement my knowledge and experience in a developed country. This is a chance for me to be in touch with the modern culture and technology of Korea.

After completing the course and returning to my college to finish my studies, i will learn Korean topik 3 certificate to look for opportunities to continue learning to become automotive engineer in Korea.

II. Research Plan

As a student of Automotive engineering, I would like to study new car technologies that I haven't had a chance to access in my school.

Firstly, during the five weeks of this course I will have the opportunity to learn more about the optimization of automobile HVAC system. I want to study what the bio signal is and how it controls the air conditioning system how it works and how to fix the damage when it happens and other signals used to control the car's cooling system. I also want to learn about how the solar collector system works and how to convert solar energy into electrical energy.

Secondly, I would like to learn how to outline the composition of a car on 3d computer software by attending Additive Manufacturing (3D Printing) Process course and how to use new tools like CAD / CAM / CAE. Then I also want to know how to simulate the drawing on the machine to be able to calculate and create a new car frame structure.

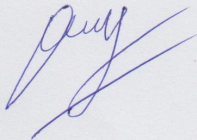

Thirdly, I would like to learn more about Welding Metallurgy and Welding Process and Design of the school so that I can have additional skills that can repair broken parts or add new details that can improve the performance of the engine.

In short, I will try to implement these plans well and after 5 weeks of learning I will gain new knowledge that can help me improve my skills and get a job in the world's largest automaker.

I would like to express my thanks to Organizing Committee, President of Chosun University, Rector and Head teachers of Ly Tu Trong College have recommended me with this course for taking the time to read this introduction.

I pledge after finishing the course in Korea I will actively learn Korean for a chance to return to study and work in Korea.

Sincerely Yours

TRAN THANH DUY

GKS for ASEAN Countries' Science and Engineering Students

Letter of Recommendation

Applicant's Information	Name	University/ College	Major	Date of Birth (MM/DD/YY)
	TRAN THANH DUY	LY TU TRONG COLLEGE OF HCMC, VIETNAM	AUTOMATIC TECHNOLOGY	10/16/1996

Dear Dr. Kang Dong - Oan,

On behalf of Ly Tu Trong College of Ho Chi Minh city, I am writing this letter to recommend the student who name TRAN THANH DUY to apply for the summer course from July 16th to August 17th 2017 in Chosun University, Korea.

Tran Thanh Duy was born in Ho Chi Minh City. The date of birth is October 16th, 1996.

Tran Thanh Duy has been a 2nd Science and Engineering Student of Ly Tu Trong College of Ho Chi Minh City, Viet Nam. He would like to be a participant of Training course to be held in Chosun University, Korea.

He is interested in the science and engineering fields and invaluable experience in Korea and he would do well if given the opportunity to participate the training course of Mechanical Engineering, Welding and Joining Science Engineering fields at Chosun University.

Due to his ability and willingness to adapt to Korean culture and life in Korea, Tran Thanh Duy would be an excellent candidate for the Program at Chosun University. I hope he will be accepted to the summer course from July 16th to August 17th 2017 in Chosun University, Korea.

Sincerely yours,

May 10th, 2018

Pham Huu Loc
